

The Department of Defense identifies AbelConn Electronics as a Key Supplier of the Standard Missile-3 System

MINNEAPOLIS April 11, 2018 – The Department of Defense’s (DOD) Aegis Ballistic Missile Defense (BMD) Program Executive Office identified AbelConn Electronics, a division of Atrenne Integrated Solutions, as a key supplier for materials that are integral to the success of the Standard Missile-3 (SM-3) System.

“We are proud to play a key role in our nation’s defense by supplying specialty rugged connectors for the SM-3 Missile System,” stated Chris Milano, President of AbelConn Division. “Recognition by the BMD Program Executive Office reaffirms that AbelConn produces the highest quality material for our customers.”

The Missile Defense Agency (MDA) initiated the “*Made for MDA campaign*” to increase quality awareness and enhance excellence throughout all tiers of the MDA supply chain. Providing the highest quality products is essential to ensure the SM-3 BMD System will be ready when called upon.

About Atrenne Integrated Solutions™

Atrenne Integrated Solutions, Inc. is an advanced, vertically-integrated, component and system provider serving aerospace, defense, computing, communications, and other technology-driven industries. Atrenne delivers integrated components, electronic packaging, fabricated metal, electronic assemblies and value-add build-to-print manufacturing services to industrial markets across the globe. With more than 40 years of experience, Atrenne provides innovatively engineered products and services throughout the program lifecycle, from concept to manufacturing to obsolescence management. Atrenne is proud to provide customers with fully-tested, reliable, electromechanical solutions on-time and with world-class quality. Atrenne is headquartered in the United States.
