# COMPLETE SYSTEM MAINTENANCE SERVICES

## PRODUCT SUMMARY

### COMPLETE SYSTEM MAINTENANCE SERVICES

Atrenne offers complete system maintenance services for all integrated, embedded systems regardless of manufacturer. Atrenne will perform troubleshooting, diagnostics, maintenance upgrades, replacement, redesign, repair and lifecycle support services on all Atrenne and third party components including enclosures, sub-assemblies, boards and integrated systems.

### SINGLE POINT OF CONTACT

The system maintenance service offering provides our customers with a single point of contact for service of a system comprised of multiple vendors' components. Frequently, a system integrator is forced to take a serial approach to troubleshooting a system across multiple vendors, and may not be capable of reproducing problems due to a lack of interoperability expertise. Eliminating the need to manage multiple vendors, working on multiple components, results in reduced down time and lower system costs.

### VERTICALLY INTEGRATED

As a vertically integrated manufacturer, Atrenne is uniquely qualified to troubleshoot, diagnose, and perform maintenance upgrades or replacements on your system or subsystem. Atrenne's extensive electromechanical design expertise and build-to-print manufacturing makes Atrenne an excellent partner for complete system design.

# COMPLETE SYSTEM MAINTENANCE SERVICES

## PRODUCT SUMMARY

### Embedded Electronics

The components, enclosures, sub-assemblies, boards and integrated systems we repair go into a variety of applications including:

- Command and control
- Avionics
- Navigation/guidance
- Electronic warfare/information warfare
- Reconnaissance/Intelligence
- Shipboard electronics/computers
- Vehicular electronics (vetronics)
- HealthTech
- Uncrewed vehicles

Atrenne's integration expertise and unique combination of in-depth mechanical, electrical, and system design knowledge is gleaned from 50+ years of work on some of the most performance-critical and demanding applications in the world.

### ABOUT

Atrenne, a Celestica company, is a vertically-integrated, component and system provider serving aerospace, defense, computing, communications, and other technology-driven industries. Atrenne delivers integrated components, electronic packaging, fabricated metal, electronic assemblies and value-add build-to-print manufacturing services to industrial markets across the globe. With more than 50 years of experience, Atrenne provides innovatively engineered products and services throughout the program lifecycle, from concept to manufacturing to obsolescence management. Atrenne is proud to provide customers with fully-tested, reliable, electromechanical solutions on-time and with world-class quality.
