

Press Release

ATRENNE COMPUTING SOLUTIONS JOINS THE OPEN GROUP SOSA™ CONSORTIUM

ADVANCING OPEN SYSTEMS ARCHITECTURE FOR THE DEFENSE INDUSTRY

Brockton, MA. - July 27, 2021 [*Atrenne, A Celestica Company*](#), (NASDAQ: CLS) a leading manufacturer of vertically-integrated, components and systems, today announced it has joined [*The Open Group Sensor Open Systems Architecture \(SOSA\) Consortium*](#). The SOSA™ Consortium aims to create a common framework for transitioning sensor systems to an open systems architecture, based on key interfaces and open standards established by industry-government consensus.

Atrenne Computing Solutions custom designs and manufactures complex and rugged, integrated electronic solutions, and specializes in mission-critical military, aerospace and defense applications that demand high reliability in extreme environments. Atrenne enables systems engineers to meet the design challenges of time-tested embedded computing system platforms and electronics enclosures for the most demanding applications. By joining the SOSA Consortium, Atrenne will contribute nearly 50 years of expertise to the acceleration and development of Open Systems Architecture for military and commercial interests.

“Atrenne fully embraces and looks forward to supporting the development of the SOSA Technical Standard for the defense industry.” said Jim Tierney, Vice President Defense and Aerospace Systems for Atrenne Computing Solutions. “Our long and strong history of designing and manufacturing technology geared towards the success of the military ecosystem will certainly be center stage in our collaborative efforts within the SOSA community”

“We are very pleased that Atrenne Computing Solutions has joined The Open Group SOSA Consortium as our newest Member”, said Judy Cerenzia, VP of Forum Operations at The Open Group. “We welcome their expertise and look forward to their contributions to the SOSA Technical Standard and Business Strategy as we continue to evolve the SOSA ecosystem.”

About Atrenne Computing Solutions

Atrenne Computing Solutions, a Celestica company, is an advanced, vertically-integrated, component and custom system provider serving aerospace, defense, computing, communications, and other technology-driven industries. Atrenne delivers custom, integrated components, electronic packaging, fabricated metal, electronic assemblies and manufacturing services to customers across the globe. With nearly 50 years of experience, Atrenne provides innovatively engineered products and services throughout the program lifecycle, from concept to manufacturing to obsolescence management. www.atrenne-cs.com

About The Open Group

The Open Group is a global consortium that enables the achievement of business objectives through technology standards. Our diverse membership of more than 840 organizations includes customers, systems and solutions suppliers, tool vendors, integrators, academics, and consultants across multiple industries. www.opengroup.org
